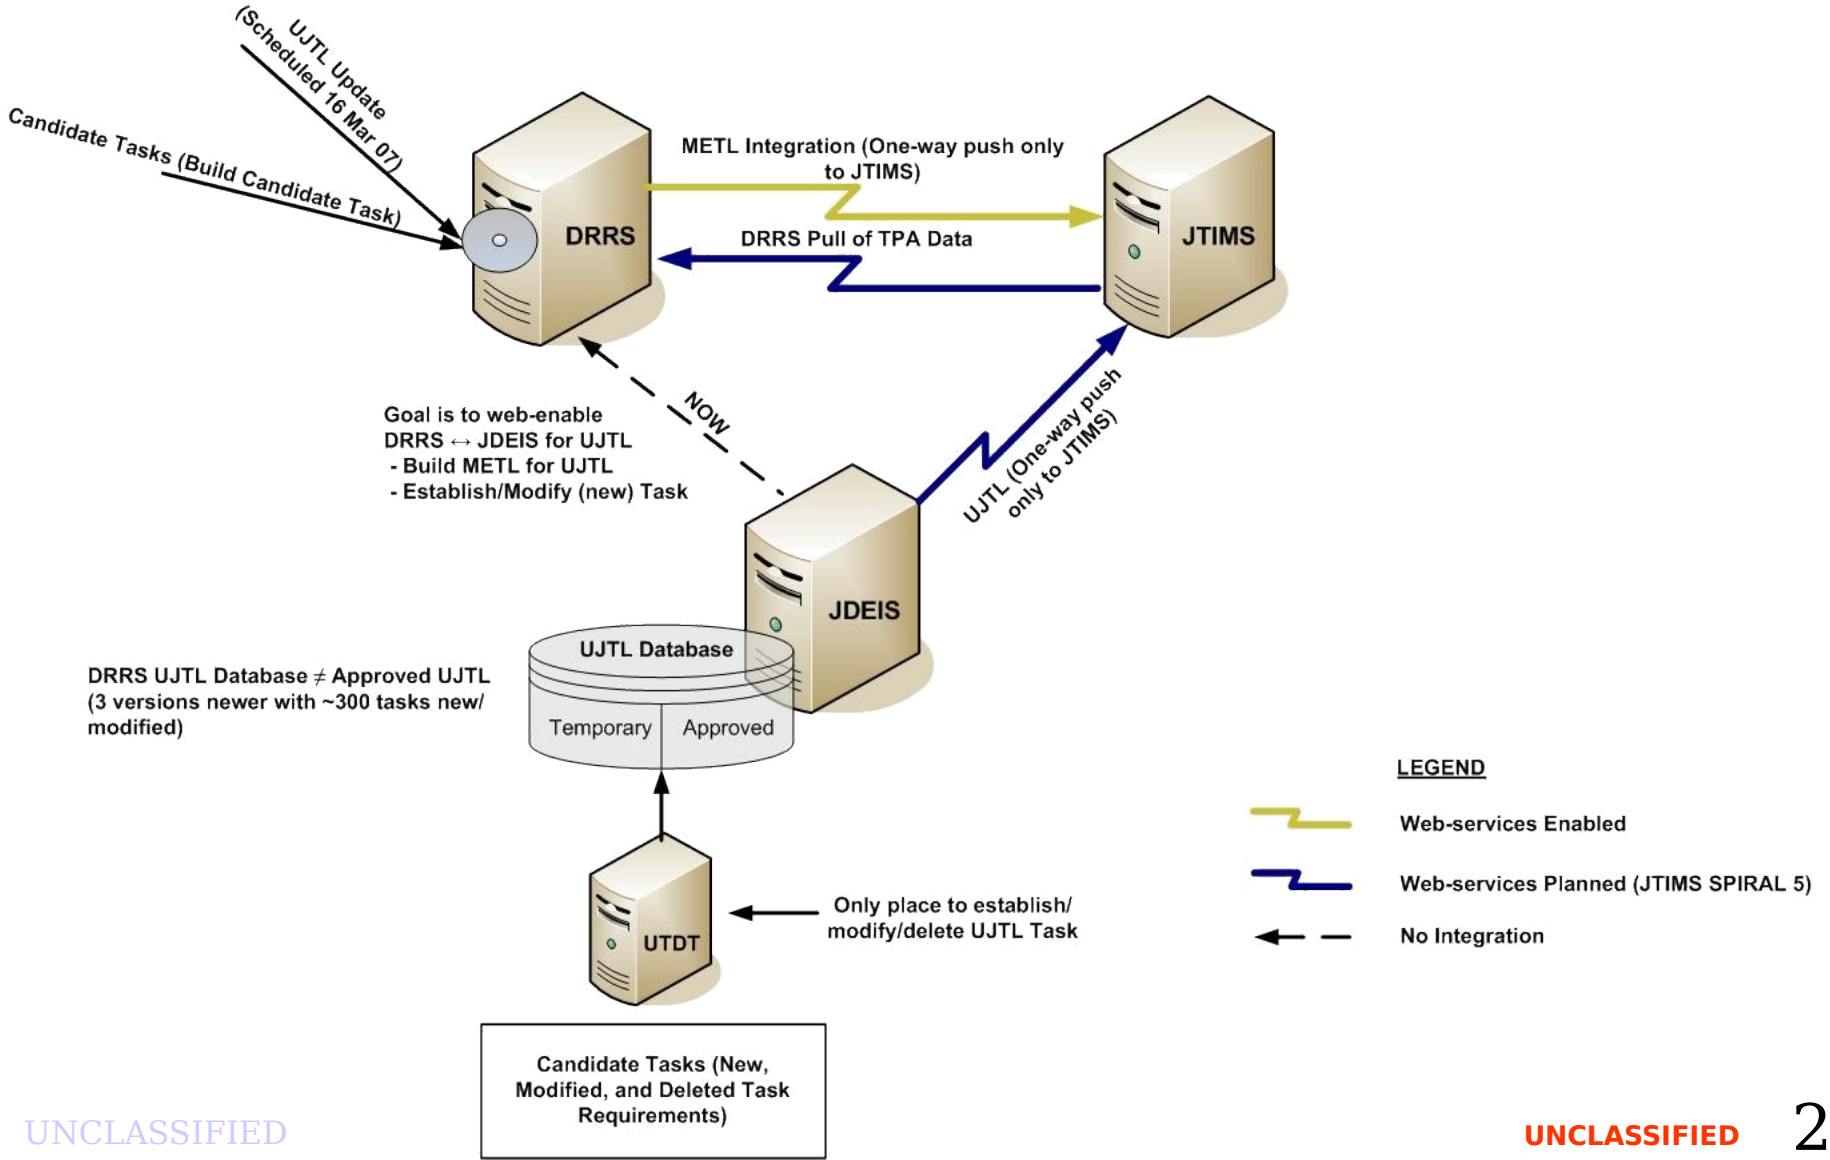
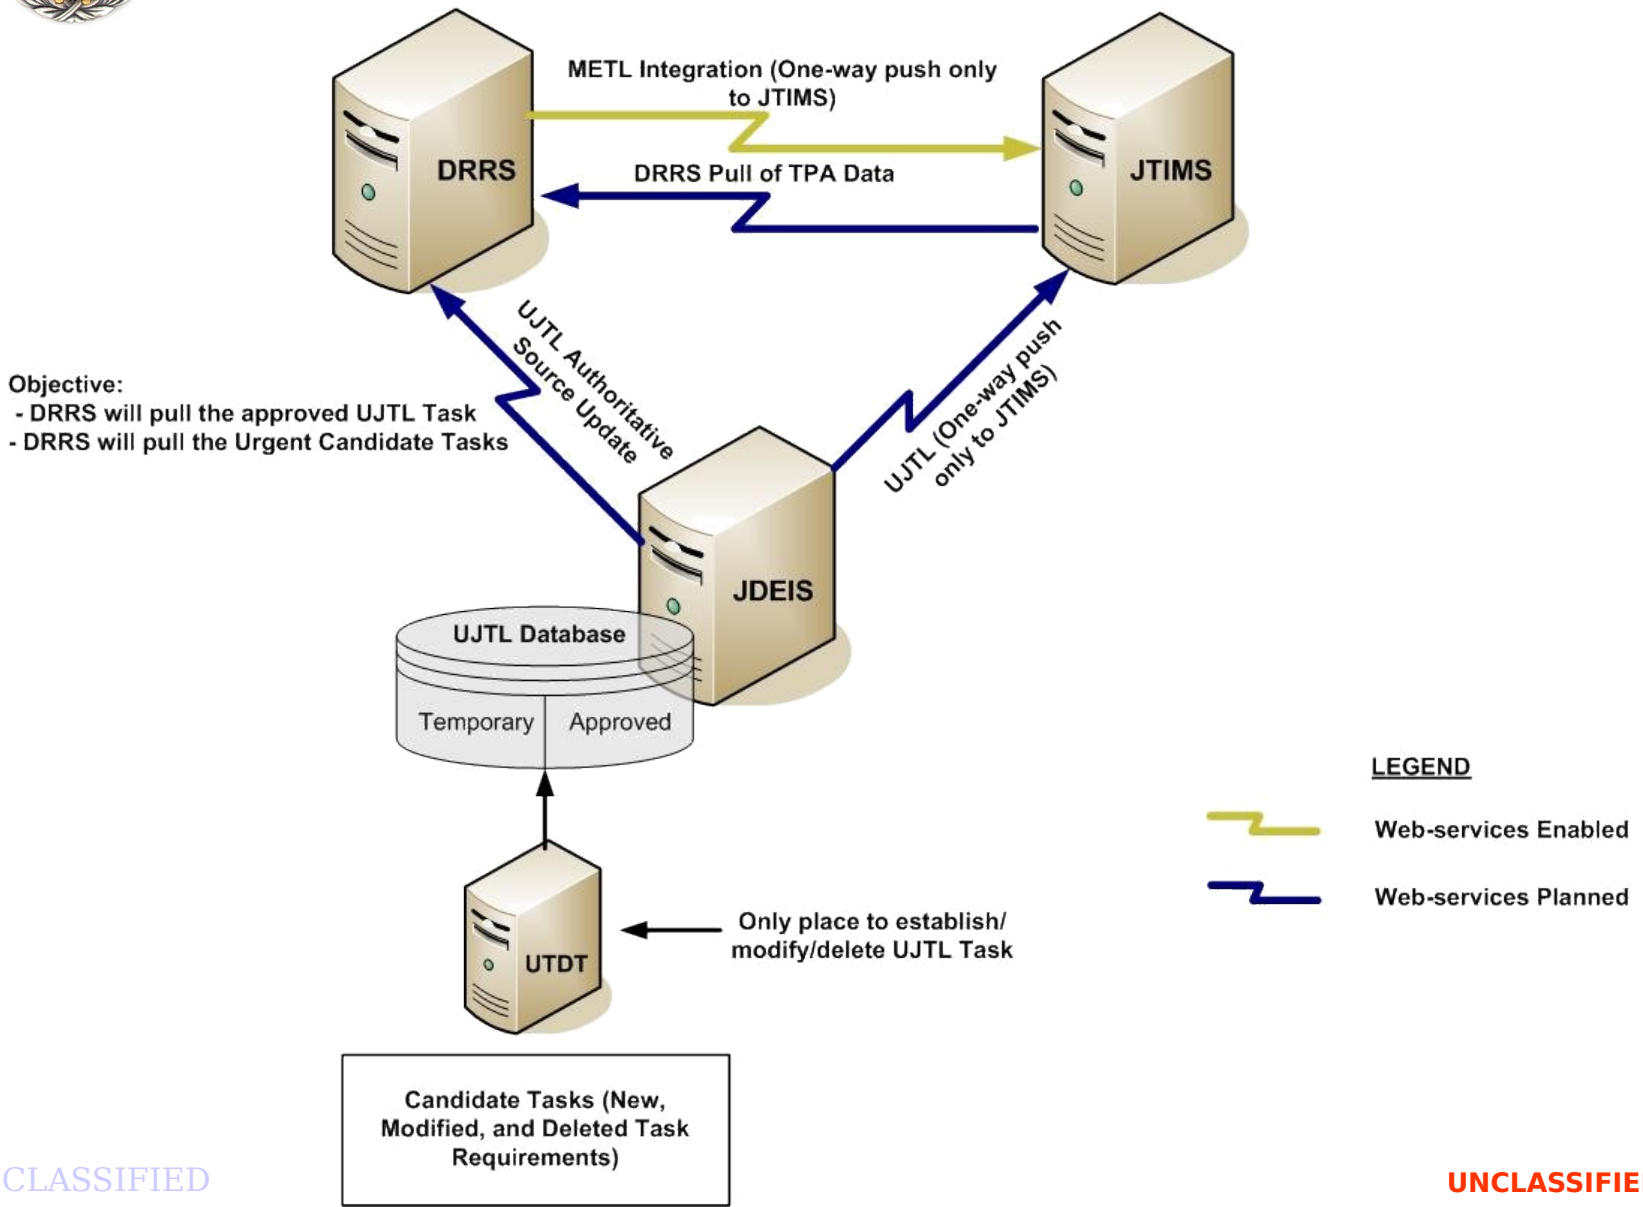
JTIMS – DRRS – JDEIS Integration

LTC Steve Morris
Joint Staff/J-7

Current System Integration



Future System Integration



Status

- OSD and JS have established weekly Executive IPRs to discuss JTIMS-DRRS-JDEIS Integration.
- OSD and Joint Staff / J7 are conducting weekly Technical IPTs to ensure fluid data integration and development coordination between DRRS, JTIMS and JDEIS:
  - Web Services (METL, UJTL, Assessment Data)
  - DRRS - JTIMS Assessment Format and Integration
  - JDEIS - Authoritative Source for COCOM/CSA UJTL and long term goal is to include Service and other Organization Tasks
  - UJTL Task Development Tool - Candidate and Modified Tasks
- JS/J7 agreed to post the UJTL Database for DRRS import. JS/J7 will post new UJTL databases to DRRS each time the UJTL database is modified. This is an interim solution until Web services can be enabled.
- OSD agreed to post the DRRS database for JTIMS import on a weekly basis. This is an interim solution until Web services can be enabled.
- OSD and JS/J7 are discussing the candidate task capability. JS/J7 will review and outline the approved UJTL candidate task process with DRRS team to facilitate links with the UJTL Task Development Tool.
